📋 DEFAULT PROJECT RULES

- ✓ **Read Every Word Carefully:** Give importance to each message. Understand the client's vision, preferences, and requirements thoroughly before starting any work.
- ✓ **Research 3-5 Best Design Stores:** Find the top performing stores in the client's niche. Study their design patterns, layouts, color schemes, and user experience. Spend up to 5 hours on research - this is an investment.
- ✓ **Get Early Approval:** Share reference stores with the client before development. Get their feedback on design direction early to avoid major revisions later.
- ✓ **Replicate & Customize:** After approval, replicate similar design elements onto the client's store while adding custom touches that make it unique.
- ✓ **Use AI for Brainstorming:** Copy the entire chat into ChatGPT or similar AI tools. Ask it to extract key requirements, identify pain points, and suggest solutions you may have missed.
- ✓ **Solid Research = Massive Progress:** The goal is that when development starts, you move fast with confidence because the groundwork is already done.
- ✓ 🚫 **No Self-Centered Thinking:** We don't work with developers who only think inside their little world. Think from the client's perspective. Think about the end user. Everything you deliver must be the BEST it can be - no shortcuts, no "good enough".
- ✓ ✅ **Self QA Before Delivery:** Before marking anything as complete, YOU must test and verify:
  - ✓ ✓ **Mobile Responsiveness:** Test on mobile, tablet, and desktop views
  - ✓ ✓ **Cross-Browser:** Check Chrome, Firefox, Safari, Edge
  - ✓ ✓ **All Links Working:** Click every button and link
  - ✓ ✓ **Forms Functional:** Test all forms, cart, checkout flow
  - ✓ ✓ **Images Optimized:** No broken images, proper alt texts
  - ✓ ✓ **Speed Test:** Run PageSpeed Insights, aim for 80+ score
  - ✓ ✓ **Spelling & Grammar:** Proofread all visible text

- ✓ ✓ **Compare with Reference:** Does it match the approved design?

Hey shreyanshsin261, I came across your profile on Fiverr Pro and think your skills would be a great fit for a project I'm working on. I'd love for you take a look at the brief and let me know if you're interested?

EV buying quote request platform

Project goal: Build a public-facing EV buying platform where sellers can request price offers for their EVs. Focus on Tesla vehicles but support all EV makes and models.

Scope of work: - Set up main website/landing pages for the EV buying brand (e.g., webuyanyev or EVBuyer) - Create an online form/flow for sellers to submit vehicle details and request a price (make, model, year, mileage, condition, location, contact info, photos) - Build an admin/dashboard view to receive, manage, and export leads (email notifications + lead status tracking) - Configure domains/subdomains and connect them to the site(s) hosted on the chosen platform - Basic SEO and conversion tracking setup (GA4 + Google Ads conversion events) - Launch a Google Ads campaign structure to drive seller leads (campaigns, ad groups, keywords, ad copy, extensions, basic landing-page alignment)

Order type: Hourly

Seller

08 Oct, 17:15
Thank you for sharing the reference, Danny! I've reviewed them and I understand the functionality you're looking for.

Seller

08 Oct, 17:16

You're looking for a custom EV buying website where customers can manually enter their vehicle details, including registration, make, model, mileage, condition, contact information, and photos, to request a quotation.

Seller

08 Oct, 17:16

All submissions would be collected in a centralized admin dashboard, allowing your team to review enquiries, manage leads, and provide offers.

Seller

08 Oct, 17:20

Am I right?

gfv_ltd

08 Oct, 17:25

that sounds good yes. google ads aiming at my domain collecting centralized admin board would be great

Seller

08 Oct, 17:25

Perfect, Danny! That sounds great. We can build a custom EV buying platform with Google Ads campaigns directing potential sellers to your website.

Seller

08 Oct, 17:26

Also, could you please confirm whether you would need separate admin, staff, and customer panels, or just one centralized admin dashboard to manage all leads, quotations, and enquiries?

gfv_ltd

08 Oct, 17:27

one centralized admin board at this point (all leads in one place)

Seller

08 Oct, 17:29

Yes, We'll build one centralized admin dashboard where you can manage and track all incoming leads.

Seller

08 Oct, 17:29

Just to clarify, would your team manually review each vehicle enquiry and provide a quotation, or would you like the website to generate instant automated valuations?

gfv_ltd

08 Oct, 17:35

that is a good question but at this stage I would want my own teams quotation to be sent back at this stage, I may change this later on with my own primeters

Seller

08 Oct, 17:37

Perfect, Danny! We can keep the quotation process manual for now and make the system flexible for automated valuations in the future.

Seller

08 Oct, 17:37

One last question: Do you already have a Google Ads account, or would you like us to set it up from scratch along with the campaigns and conversion tracking?

gfv_ltd

08 Oct, 17:40

i would like you to set it all up from scratch please

Seller

08 Oct, 17:42

Perfect, Danny! We'll handle the complete Google Ads setup from scratch as well. Before I prepare the detailed scope and pricing, I just have three final questions. Firstly, would you like all your domains connected to one main website, or separate landing pages for each brand? Secondly, would your team prefer to send quotations directly through the admin dashboard or manually via email? Lastly, will your Google Ads target the entire UK, and do you have an approximate monthly advertising budget in mind? Also, would you need ongoing ad management or just the initial setup?

gfv_ltd

08 Oct, 17:55

so idea is one website - with 3 seperate landing pages 1/ tesla (pictures of

tesla's) 2 All EV's (pictures different EV, Fiat MG VW) 3 All EV Vans (pictures EV vans nissan ford toyota) ETC

gfv_ltd

08 Oct, 17:57

send quotations through the admin dashboard but we would like this possible on the business whatsapp if thats possible ?

gfv_ltd

08 Oct, 18:00

what budget do you suggest to get us running from the start?

Seller

08 Oct, 18:00

Perfect, Danny! We'll build one website with three landing pages for Tesla, all EVs, and EV vans. We can also integrate WhatsApp Business for sending quotations from the admin dashboard

Just to clarify, Danny, Google Ads management is not included in our ongoing support, and SEO optimization is a one-time setup process. Our post-launch support covers website-related issues, bug fixes, minor changes, adjustments, and technical assistance during the agreed support period.

Seller

08 Oct, 18:33

Our post-launch support ensures you're not left on your own after the website is completed and delivered. Even after the project is officially launched, if you face any technical issues, bugs, errors, or need minor changes to the website, our team will be available to assist you.

This support can include:

• Fixing bugs or technical issues
• Resolving website errors
• Making minor content or design adjustments
• Assisting with website functionality
• Helping with small updates or changes
• Providing guidance on managing the website

Our goal is to ensure your website continues to run smoothly and that you have reliable support whenever you need assistance after launch.

Seller

08 Oct, 19:08
Just to clarify, Danny, we're not providing ongoing Google Ads management. We're handling the website's one-time SEO optimization, which also helps make the landing pages better prepared for Google Ads. Our post-launch support is focused on website-related bugs, technical issues, minor changes, and adjustments during the agreed support period.

Seller

Hi, I completely understand, and I really appreciate your honesty! 😊 If you could share the budget you have in mind, I'd be happy to see how we can adjust the scope to make it work for you while maintaining the quality you're looking for. We'd love to find a solution that works for both of us!

Seller

09 Oct, 14:22
Just to give you a clearer picture, the plan includes the complete custom-built EV buying platform, with three dedicated landing pages for Tesla, all EVs, and EV vans, a multi-step quotation form with photo uploads, and a secure centralised dashboard to manage every lead. Your team can manually price

each vehicle and send professional quotations by email, with notifications, lead tracking, and full platform ownership. It also includes testing, launch, and 1 month of support, with delivery in 35 days. Everything is built to allow Google Ads and automated valuations to be added later without rebuilding the platform.

Seller

09 Oct, 14:24

We're including all of this in the plan, and we'd really love to make it work for you. 😊 Feel free to share the budget you have in mind, or let me know if you'd like to discuss any features or adjust the scope. We're happy to explore the best possible solution together!
